Acknowledgements

This document is the culmination of eight years of collaborative effort by many individuals. Foremost among these are Ursula McCracken, Textile Museum Director from 1988 to 2004, who proposed the project to the Cotsen Family Foundation and whose advocacy sustained the project and brought it to fruition, and Lloyd E. Cotsen, whose foundation funded the project and who has remained committed throughout. Daniel Walker, current Textile Museum Director, enthusiastically supported the completion and publication of this Thesaurus.

The terminology work leading to this Thesaurus has been a major focus, among other pursuits, of the Lloyd Cotsen Textile Documentation Project (LCTDP) at The Textile Museum. Former Directors Madelyn Shaw, Carol Coleman, and Sonja Nielsen, Associates Lydia Fraser and Carrie Beauchamp, and Assistants Erin Roberts, Brewer Thompson, and Jocelyn Gottschalk all made valuable contributions that have shaped the form and content of this Thesaurus.

Textile Museum curators originated the cataloging vocabulary and contributed many hours of thought and work towards a unified terminology. Ann Pollard Rowe, Curator of Western Hemisphere Collections, in particular, shared her immense expertise and ongoing work on textile terminology and classification, as well as her subject expertise, along with Sumru Belger Krody, Associate Curator for Eastern Hemisphere Collections; Mattiebelle Gittinger, Research Associate for Southeast Asian Textiles; and Carol Bier, Research Associate for Islamic Textiles.

A project of this scope could not have been realized without the assistance of outside consultants as well. Under LCTDP's Cotsen Scholar program, textile scholars from around the world participated in textile documentation sessions and terminology discussions that informed the present work. Cotsen Scholars were: Lisa Aronson, Skidmore College; Ruth Barnes, Ashmolean Museum; Stuart (Ed) Carter, Oxford University; Peter Collingwood, independent scholar; Joyce Denney, Metropolitan Museum of Art; C.D. (Dee) DeRoche, independent scholar; Mary Dusenbury, Spencer Museum of Art, University of Kansas; Marianne Ellis, independent scholar; Kathleen Epstein, independent scholar; Kate Fitz Gibbon, independent scholar; Rens Heringa, independent scholar; Desirée Koslin, Fashion Institute of Technology; Eunice Maguire, Johns Hopkins University; Mary McWilliams, Arthur M. Sackler Museum, Harvard University; Miriam Milgram, independent scholar; Milton Sunday, independent scholar; Elena Tsareva, Russian

Ethnographic Museum; Angela Völker, Austrian Museum of Applied Art; Yoshiko Wada, independent scholar; Jennifer Wearden, Victoria and Albert Museum; and Verity Wilson, Victoria and Albert Museum.

As textile specialists, LCTDP and TM staff also benefited greatly from the expertise of information management specialists as we learned the nature of thesauri, their construction, and their presentation. Lydia Fraser ably indexed this publication and designed the presentation format. Consultants Jessica Milstead, Jelem, Inc., and Dagobert Soergel, University of Maryland, also were invaluable to the execution of this project.

Cecilia Gunzburger
Manager, Lloyd Cotsen Textile Documentation Project

Introduction

The Textile Museum Thesaurus is a data management tool for cataloging and searching for textiles in The Textile Museum's collection in its electronic database. The Thesaurus functions both as a controlled vocabulary for cataloging our collections and as an electronic querying aid structured to permit the highest level of success in retrieving the appropriate objects during searches. The document in this book has been exported from The Textile Museum's ARGUS collections database in order to share our cataloging terminology with others responsible for the management of textile collections.

Purpose

As an electronic thesaurus, the database of terms from which this document was generated works in conjunction with a database of object records to track catalog data, to enforce consistency of data during entry, and to expand entry values for querying.

The Textile Museum developed this Thesaurus because no currently available vocabulary resource meets our need to deal with textiles globally, or develops textile terminology to the level of detail necessary for textile specialists. The Textile Museum Thesaurus is, of course, idiosyncratic to its collection, software, data standards, and current curatorial staff preferences. This publication is intended to provide a model of an electronic thesaurus for cataloging textiles to the museum and textile fields. We expect that other institutions will adapt, expand, and/or draw from our Thesaurus as appropriate to their collections and needs.

Scope

The Textile Museum Thesaurus contains terms used in the description of the primarily Asian, Middle Eastern, African, and indigenous American handmade textiles in its collection. Although the classification scheme in each category was developed to accommodate the widest variety of terms applicable to textiles, only terms currently in use in The Textile Museum's catalog records are included within these hierarchies. As our collections grow, as research and scholarship progress, and as searching strategies evolve, new terms will be added to the thesaurus and organized within the hierarchies, and the hierarchies will be adjusted as necessary. The Thesaurus itself is a constantly-evolving working document.

This publication contains terms in four major textile-specific categories: Object, Material, Structure, and Technique. Object includes names for textiles and related objects, as well as for textileworking equipment. Material includes terms for the substances of which textiles are made. We have created separate categories for Structure, terms for describing the physical relationships of the elements within a textile, and for Technique, terms for the processes used to create textiles.

Each section contains the terms we use to catalog our museum objects. This Thesaurus is neither an exhaustive list of textile terms nor a textile encyclopedia. It does not contain definitions, illustrations, or bibliographic references. This publication is intended to share our preferences among textile terms and organizational schemes with colleagues in the field. It is not intended to provide information on what these terms mean or on how to apply them to any particular object.

This publication contains only the textile-specific sections and terms from our larger electronic thesaurus. The Textile Museum uses existing external authorities for linguistic, cultural, and geographic terms, for example, which have not been included here. We also record catalog data on designs and colors, and for non-textile objects in our collection, but have not included these terms in this publication because we are not an authority on those subjects.

Terms

The Textile Museum Thesaurus contains 2948 terms, of which 2263 are preferred. The terms included in the Thesaurus are intended to provide a vocabulary for cataloging the textiles in The Textile Museum's collections. As an institutional tool, this Thesaurus must accommodate the cataloging practices of several individual curators and research associates, and therefore seeks to be descriptive of textile terminology currently in accepted usage, rather than proscriptive according to any single perspective.

Each term represents a discrete concept. Terms may be post-coordinated; that is, combined in whatever ways necessary to fully describe a particular object. For example, the term *fragment* may be combined with any object term to indicate an incomplete state, or the term *warp-faced* may be combined with any weave structure name to indicate this attribute of the fabric.

Homographs, or words with multiple meanings in the context of this Thesaurus, are separated into two discrete terms distinguished by qualifiers in curly brackets that identify the sense of the word. For example the word *cap* refers both to a type of hat and to a batik

technique; therefore, two separate terms appear in the Thesaurus in their respective places in the Object and Technique hierarchies: *cap* {*headwear*} and *cap* {*batik technique*}.

While this is primarily an English-language terminology, foreign terms are included as appropriate for describing textiles in our collection. Direct translations of English terms are treated as discrete terms, classified under their English equivalents. In this sense, foreign terms are treated as specific instances of the concepts or object types represented by the English terms, which is not in conformance with thesaurus standards.

Verb terms in the Structure and Technique sections tend to occur in the past tense (past participle), since we are concerned with describing museum objects that were manufactured in the past. The present tense (gerund) is used in some cases, for technique concepts and for structure terms in which the gerund form is in established usage, such as *interlacing*. Other verb forms of each term are often available as legal alternate terms in the electronic database, but have been omitted from this publication for space reasons.

The singular form of noun terms is usually preferred, again due to our need to describe individual museum objects. Exceptions occur when the plural form is in established usage; for example, *pants*. Again, plurals are often available as legal alternate terms in the electronic thesaurus but are not included here in order to save space.

Hyphenation of terms follows the Chicago Manual of Style, 15th edition. Incorrect and non-preferred hyphenations also are often included in our database as illegal alternate terms, but have been omitted here.

Relationships

The relationships defined between the terms in The Textile Museum Thesaurus are based on the functionality of the thesaurus component in Questor Systems' ARGUS collections management software. For this publication, relationships have been reduced to two types: broader/narrower and preferred/alternate. In our database, when a query is run on a term, the search returns records containing not only that term, but all narrower and alternate terms of that term as well. A search on an alternate term returns records containing the preferred term and its narrower terms. Therefore, a term is designated as broader or alternate when a user looking for the term would reasonably expect to find objects cataloged using its associated narrower or preferred terms.

The broader/narrower (or hierarchical) relationship results in the classified format of the thesaurus. The classification is constructed to facilitate searching by mapping generic terms and categories to more specific terms and instances, and terms are classified where most useful for searching in the context of The Textile Museum's collections. A term may have more than one broader term; that is, it may appear in more than one place in the hierarchies. For example, the term *Nô robe* is a narrower term of both *Nô costume* and of *robe*. In some cases hierarchical relationships do not follow strict thesaurus standards; i.e. a narrower term is not *always* a part, species, or instance of its broader term. For example, the term *anaku* can refer to both a *dress* and a *skirt*, and so is classified under both of these terms. This will result in some extraneous objects in search results. We prefer, however, that searches return all objects sought, even with a few extraneous items, rather than returning only a portion of the objects sought.

The placement of terms in the hierarchy also does not always correspond to existing conceptual classifications, including Irene Emery's *Primary Structures of Fabrics*, first published by The Textile Museum in 1966. Technique and structure terms have been separated into two hierarchies in order to reflect the differences between these two concepts. Emery's categories have been retained in the technique classification, since, ironically, they are more useful for gathering technique terms than for gathering structure terms (see Ann Rowe's "In Search of a Classification of Textile Techniques," in *CIETA Bulletin* 73, 1995-96, pp. 123-139). Structure terms have been organized based on the semantic connotations of the terms themselves, bringing together, for example, all of the types of *interlacing*. In many cases, terms could be placed in either structure or technique (e.g. *twining*), and structure has been preferred since we are dealing with the cataloging of existing objects rather than field recording of techniques. The hierarchies in this Thesaurus do not purport to be a comprehensive classification of textile structures and techniques; placement in the hierarchy in *The Textile Museum Thesaurus* depends solely on searching utility. In other sections of the Thesaurus, the classification also does not always conform to accepted systems, such as biological taxonomies or chemical classifications.

The preferred/alternate (or equivalence) relationship permits The Textile Museum to maintain standardization of the vocabulary entered into our object records while at the same time allowing a broad range of access terms for searching. When synonyms, obsolete versions, and alternate spellings of a term exist, The Textile Museum has chosen one term as its preferred term. Other versions are linked to the preferred term as alternate terms, which may be either legal (allowed in data entry) or

illegal (not allowed in data entry). Alternate terms may have more than one preferred term; for example, in the case of ambiguous terms such as *satín*, we ask that catalogers specify *satín weave* or *satín stitch*.

Updating

This document represents the textile-specific portions of The Textile Museum's electronic thesaurus as of November 7, 2005. As outlined above, the Thesaurus is a living, working document. We welcome feedback from others responsible for cataloging and managing textile collections on the usefulness, applicability, and expansion of *The Textile Museum Thesaurus*. Please contact:

How to Use this Document

Throughout the document, preferred terms appear in regular script and alternate terms appear in italics. While this practice results in italicization that is not always consistent with standard stylistic conventions for narrative texts (e.g. for foreign terms and taxonomic nomenclature), it provides a consistent visual distinction between preferred and alternate terms throughout this document.

The Hierarchies in this document contain The Textile Museum's preferred terms arranged according to their hierarchical classification. The Hierarchy Overview provides a collapsed view of the top several levels of each hierarchy. Within each hierarchy, the narrower terms of each term are arranged in alphabetical order. Levels within each hierarchy are indicated by dots to aid in following the hierarchy from page to page. The alphanumeric codes for each position in the hierarchy, at the left of each page, allow movement from the alphabetical Term Index to a term's appearance in the appropriate Hierarchy. Alternate terms appear after their respective preferred terms, preceded by an equals sign (=) if they are allowed in data entry (legal), and by an X sign (X) if they are not allowed in data entry (illegal) but are available for searching. Legal alternate terms appear first, followed by illegal alternate terms; within each category, alternate terms appear in alphabetical order.

The Term Index contains every term in the Thesaurus, whether preferred, alternate, legal, or illegal, in letter-by-letter alphabetical order. A preferred term is followed by a hierarchy code [O(bject), M(aterial), S(tructure), T(echnique)] and an alphanumeric code, which corresponds to its position in that hierarchy. A legal alternate term will suggest that users SEE its preferred term(s), and an illegal alternate term will ask that users USE its preferred term(s) instead. To find an alternate term's appearance in the Hierarchies, look up the indicated preferred term in the Term Index and follow that term's code.

Hierarchy Overview

Object

- A** **textile by physical aspects**
- AA . basketry
 - AB . cordage
 - AC . fabric
 - AD . Oriental rug
 - AE . textile by shape or size
 - AF . textile fragment
 - AG . textile in process

- B** **object by social context**
- BA . ceremonial textile
 - BB . emblematic textile
 - BC . textile for exchange
 - BD . sacred textile
 - BE . theater textile

- C** **object by use**
- CA . architectural object
 - CB . costume
 - CC . equipment
 - CD . furnishing
 - CE . multipurpose textile
 - CF . object component
 - CG . representational object

- D** **object modifier**
- DA . fragment
 - DB . object area
 - DC . object attribute
 - DD . part

Material

- A** **material by function**
- AA . adhesive
 - AB . colorant
 - AC . size {material}

- B** **material by property**
- BA . fibrous material

- C** **material by source**
- CA . inorganic material
- CB . organic material

Structure

- A** **accessory structure**
- AA . accessory pile
- AB . applied objects
- AC . fabric complex
- AD . stitch

- B** **edge finish**

- C** **interworked elements**
- CA . intersecting elements
- CB . parallel rows of elements
- CC . pile

- D** **manipulated fabric**

- E** **textile structure attribute**

- F** **yarn function**

- G** **yarn structure**

Technique

- A** **accessory technique**

- B** **fiberworking**
- BA . fiber consolidating
- BB . fiber processing
- BC . yarn-making

- C** **interworking elements**
- CA . multiple sets of elements technique
- CB . single element technique
- CC . single set of elementstechnique

- D** **textile coloring**
- DA . bleached
- DB . dyeing
- DC . painting {technique}
- DD . printing

- E** **textile finishing**

EI	. exchange of like elements
EI1	. . warp interchange
EI2	. . warp substitution
EI3	. . weft interchange
EI4	. . weft substitution
EJ	. number of colors
EJ1	. . 2-color
EJ2	. . 3-color
EJ3	. . 4-color
EK	. number of elements
EK1	. . 2-strand
EK2	. . 3-strand
EK3	. . 4-strand
EK4	. . 5-strand
EK5	. . 8-strand
EK6	. . 16-strand
EK7	. . 32-strand
EL	. number of elements per unit
EL1	. . multiple warp
EL2	. . multiple weft
EL3	. . paired warp
EL4	. . paired weft
EL5	. . tripled warp
EL6	. . tripled weft
EM	. orientation of elements
EM1	. . countered
EM2	. . inverted
EM3	. . reversed
EN	. pile attribute
EN1	. . cut-and-uncut pile X <i>ciselé</i>
EN2	. . cut-pile
EN3	. . looped-pile = <i>uncut-pile</i>
EN4	. . pile-on-pile
EN5	. . voided
EO	. relationship of faces
EO1	. . double-faced
EO2	. . two-faced
EP	. ribbed
EQ	. simple
ER	. spacing of elements
ER1	. . closed
ER2	. . compacted
ER3	. . diverted
ER4	. . open
ER5	. . spaced

ES	. .	tubular
ET	. .	weave structure attribute
ET1	. . .	fabric face
ET1.1	warp-float face X <i>warp-float faced</i>
ET1.2	weft-float face X <i>weft-float faced</i>
ET2	. . .	float-patterned X <i>self-patterned</i>
ET2.1	warp-float patterned X <i>warp-float, warp-float pattern</i>
ET2.2	weft-float patterned X <i>weft-float, weft-float pattern</i>
ET3	. . .	rug structure attribute
ET3.1	crossed weft
ET3.2	depressed warps X <i>warps on two levels</i>
ET3.2.1	<i>semi-depressed warps X slightly depressed warps</i>
ET3.4	jufti knots
ET3.5	offset knotting
ET3.6	packing knots
ET3.7	warp sharing
ET3.8	weft shot
ET4	. . .	set of elements visible
ET4.1	balanced
ET4.2	warp-faced X <i>warp face</i>
ET4.3	warp-predominant
ET4.4	weft-faced X <i>weft face</i>
ET4.5	weft-predominant
ET5	. . .	single weft X <i>single-wefted</i>
ET6	. . .	supplementary sets attribute
ET6.1	floating X <i>flushing</i>
ET6.2	inlaid X <i>inlay, laid-in</i>
ET7	. . .	tapestry weave attribute
ET7.1	dovetailed X <i>toothed</i>
ET7.2	eccentric weft
ET7.3	interlocked
ET7.3.1	double-interlocked
ET7.3.2	single-interlocked X <i>single interlock</i>
ET7.4	lazy lines
ET7.5	slit
ET7.6	underfloated weft
ET8	. . .	transposed warp
ET9	. . .	turned
ET9.1	damask X <i>satın damask, twill damask</i>
ET9.2	turn-banded
ET10	. . .	twill binding X <i>twill</i>
ET11	. . .	warp configuration

- ET11.1 . . . circular warp
- ET11.2 . . . dovetailed warp
- ET12 . . . warp-patterned
- ET13 . . . weave derivation
- ET13.1 . . . plain weave-derived
- ET13.2 . . . twill-derived
- ET14 . . . weave function
- ET14.1 . . . ground weave = *foundation weave*
- ET14.2 . . . supplementary weave = *foundation weave*
- ET15 . . . weft-patterned

F **yarn function**

- FA . . . seaming thread
- FB . . . warp
- FB1 . . . binding warp
- FB2 . . . complementary warp
- FB3 . . . ground warp = *foundation warp*
- FB4 . . . inner warp
- FB5 . . . resist-dyed warp
- FB6 . . . selvedge warp
- FB7 . . . supplementary warp
- FB7.1 . . . supplementary pile warp = *pile warp*
- FC . . . weft X *woof*
- FC1 . . . backing weft
- FC2 . . . complementary weft
- FC3 . . . ground weft = *foundation weft*
- FC4 . . . outlining weft
- FC5 . . . resist-dyed weft
- FC6 . . . supplementary weft X *brocading weft*,
extra weft
- FC6.1 . . . supplementary pile weft
- FC7 . . . tapestry weft
- FC8 . . . twining weft
- FC9 . . . wrapping weft
- FD . . . yarn function attribute
- FD1 . . . complementary
- FD2 . . . eccentric
- FD3 . . . supplementary

G **yarn structure**

- GA . . . metallic-wrapped
- GB . . . plied
- GB1 . . . corded
- GB2 . . . 4-ply
- GB3 . . . 3-ply

GB4	. .	2-ply
GC	.	S-spun
GD	.	spliced
GE	.	twisted
GF	.	unspun
GG	.	Z-spun

Technique

A

accessory technique

- AA . gilded X *applied gold*
- AA1 . . prada
- AA2 . . surihaku
- AB . hooked {technique}
- AC . needlework = *stitched*
- AC1 . . appliqué X *reverse appliqué*
- AC2 . . embroidery
- AC2.1 . . . counted work = *counted, counted stitch*
- AC2.2 . . . cutwork
- AC2.3 . . . deflected element work X *drawn-fabric work, drawn-thread work, pulled work*
- AC2.4 . . . hand embroidery
- AC2.5 . . . tambour work
- AC2.6 . . . machine embroidery
- AC2.7 . . . withdrawn element work X *drawn work, drawn-thread work, pulled work*
- AC2.7.1 hemstitch X *needleweaving*
- AC3 . . quilted
- AC3.1 . . . sashiko
- AC4 . . sewn
- AC4.1 . . . basted
- AC4.2 . . . darned
- AC4.3 . . . hand sewn
- AC4.4 . . . machine sewn X *machine stitched*
- AC5 . . smocked

B

fiberworking

- BA . fiber consolidating
- BA1 . . beaten
- BA2 . . felted
- BA3 . . papermaking
- BB . fiber processing
- BB1 . . carded
- BB2 . . combed
- BB2.1 . . . worsted X *worsted wool*
- BB3 . . ginned
- BB4 . . retted
- BC . yarn-making
- BC1 . . spun

- BC1.1 . . . hand spun
- BC1.2 . . . machine spun X *machine*

C interworking elements

- CA . . . multiple sets of elements technique
- CA1 . . . weaving
 - CA1.1 . . . backstrap-loom woven
 - CA1.2 . . . double-woven
 - CA1.3 . . . drawloom woven
 - CA1.4 . . . handwoven
 - CA1.5 . . . jacquard-loom woven
 - CA1.6 . . . machine woven
 - CA1.7 . . . strip-loom woven
 - CA1.8 . . . tablet woven X *card woven*
 - CA1.9 . . . treadle-loom woven
- CB . . . single element technique
 - CB1 . . . crochet
 - CB2 . . . knitting
 - CB2.1 . . . crossed knitting
 - CB2.2 . . . machine knit
- CC . . . single set of elements technique
 - CC1 . . . braiding
 - CC1.1 . . . square braiding
 - CC2 . . . macramé
 - CC3 . . . plaiting
 - CC4 . . . ply-splitting X *split-ply*
 - CC5 . . . sprang

D textile coloring

- DA . . . bleached
 - DA1 . . . discharged = *discharge-patterned*
 - DA1.1 . . . discharge print
- DB . . . dyeing
 - DB1 . . . dyeing by application method
 - DB1.1 . . . painted dyes
 - DB1.2 . . . vat dyed
 - DB3 . . . dyeing by application timing
 - DB3.1 . . . overdyed
 - DB3.2 . . . piece dyed
 - DB3.3 . . . yarn dyed
 - DB4 . . . selective dyeing
 - DB4.1 . . . mordant dyed
 - DB4.1.1 painted mordants = *drawn mordants*,
X mordant painted, mordant drawn

DB4.1.1.1	kalamkari X <i>qalimkar, qalamkar, qalamkari</i>
DB4.1.2	stamped mordants X <i>mordant stamped</i>
DB4.2	resist dyed = <i>resist-patterned</i>
DB4.2.1	resist dyeing by resist application method
DB4.2.1.1	compression resist
DB4.2.1.1.1	bound <i>resist = tied resist, X resist-tied, tie dye</i>
DB4.2.1.1.1.1	adire oniko
DB4.2.1.1.1.2	bandhani
DB4.2.1.1.1.3	plangi
DB4.2.1.1.1.4	shibori

DB4.2.2.1.1.5.2	limar X <i>limau</i>
DB4.2.2.1.1.5.3	mat mii = <i>mud mii</i>
DB4.2.2.1.2	itajime
DB4.2.2.1.3	jaspe
DB4.2.2.1.4	kasuri
DB4.2.2.1.4.1	e-kasuri X <i>e-gasuri</i>
DB4.2.2.1.4.2	iyo-gasuri
DB4.2.2.1.4.3	kon-gasuri
DB4.2.2.1.5	warp- and weft-resist dyed
DB4.2.2.1.5.1	compound ikat
DB4.2.2.1.5.2	double ikat
DB4.2.2.1.6	warp-resist dyed

DB4.2.2.1.6.1	warp ikat
DB4.2.2.1.6.2	zone dyed X <i>area-dyed</i>
DB4.2.2.1.7	weft-resist dyed
DB4.2.2.1.7.1	weft ikat
DB4.2.2.1.7.1.1	endek
DB4.2.2.1.7.1.2	limar X <i>limau</i>
DB4.2.2.1.7.1.3	mat mii = <i>mud mii</i>
DB4.2.3	resist dyeing by resist material
DB4.2.3.1	paste resist
DB4.2.3.1.1	adire eleko
DB4.2.3.1.2	yuzen
DB4.2.3.1.2.1	kata yuzen
DB4.2.3.1.2.2	tegaki yuzen
DB4.2.3.2	stenciled X <i>stencil print</i>
DB4.2.3.2.1	bingata
DB4.2.3.2.2	katazome
DB4.2.3.2.3	screen print
DB4.2.3.3	wax resist
DB4.2.3.3.1	batik
DB4.2.3.3.1.1	batik cap = <i>cap {batik technique}</i> , X <i>tjap</i>
DB4.2.3.3.1.1.1	kombinasi X <i>kombinasi</i>
DB4.2.3.3.1.2	batik tulis = <i>tulis</i>
DB4.2.3.3.1.2.1	kombinasi X <i>kombinasi</i>
DB4.2.3.3.1.3	nitik X <i>nithik</i>
DB4.2.3.3.2	rozome = <i>rokechi, roketsuzome</i>
DC	painting {technique}
DC1	hand painted
DC2	painted dyes
DC3	painted mordants = <i>drawn mordants</i> , X mordant painted, mordant-drawn
DC3.1	kalamkari X <i>qalimkar, qalamkar, qalamkari</i>
DC4	painted resist X <i>resist painted</i>
DC4.1	tsutsugaki
DE	printing
DE1	hand printed
DE2	machine printed
DE3	printing by application method
DE3.1	intaglio print
DE3.1.1	copperplate print
DE3.1.2	roller print X <i>cylinder print</i>
DE3.1.2.1	duplex print
DE3.2	relief print = <i>stamped X stamp print</i>
DE3.2.1	block print
DE3.3	screen print

- DE4 . . printing by application timing
- DE4.1 . . . warp print
- DE5 . . printing by material applied
- DE5.1 . . . discharge print
- DE5.2 . . . stamped mordants X *mordant stamped*
- DE5.3 . . . stamped resist X *resist stamped*

E **textile finishing**

- EA . beaten
- EB . brushed
- EC . calendared
- EC1 . . embossed
- EC2 . . glazed
- EC3 . . moiré = *watered*
- ED . flocked
- EE . fulled
- EF . sized
